DETAILED ACTION

REASONS FOR ALLOWANCE

1. Claims 1, 3, 6, 27 are allowed.
2. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 1, 3, 6, 27 is the inclusion of the method steps of controlling the driving function of a liquid droplet ejection head that includes using a single driving signal inclusive of: single micro oscillation pulse, first ejection pulse corresponding to specification of a first nozzle array, second ejection pulse corresponding to specification of a second nozzle array, single damping pulse; *wherein micro oscillation pulse is inputted before the first and second ejection pulses in one print cycle and damping pulse is inputted after the first and second ejection pulses; wherein first nozzle array ejects a first function liquid amount and second nozzle array ejects a second function liquid amount which is smaller than the first function liquid droplet ejection amount.* It is these steps found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
